INTRODUCTION

The capital budget delineates future projects planned as part of Howard Community College’s (HCC) five-year capital improvements program and 10-year facilities master plan. New construction and renovation of existing facilities are critical components of these plans and are consistent with the college’s mission, vision, and strategic initiatives. The justification for capital projects is directly related to the college’s enrollment. Capital projects are planned using current student enrollment and 10-year student enrollment projections. The current enrollment and projected enrollment growth, along with the state space allocation guidelines, are calculated and used in determining higher education space needs that are eligible for capital funding.

In accordance with the provisions of the Education Article of the Annotated Code of Maryland and the Code of Maryland Regulations (COMAR), each college is mandated to generate a comprehensive facilities master plan that establishes a framework for the orderly development of all capital improvements that supports the institution’s role and mission. The plan is required to cover a period of no less than 10 years with a land-use plan covering 20 years. Additionally, it is required that the plan be updated whenever major changes occur in role and mission, or in plan components that have significant facilities implications. While the current master plan covers the 2015-2025 period, the college is in the process of planning the next update which will take place in 2024 for submission to the State agencies by February 2025. The new plan will cover the period 2025-2035.

As part of prioritizing capital development on campus, the college relies on its 10-year facilities master plan to guide the five-year capital improvements program. These plans address the physical environment of the campus and how that environment helps the college to succeed in its educational mission. They also assess the college’s existing facilities, utilities, information technology infrastructure, sustainability and environmental impact, and transportation and parking, as well as space needs and academic planning. An examination of the college’s academic programs, enrollment patterns, unique institutional characteristics, staffing trends, space utilization, and instructional direction is also included.

Technology is a strategic asset that is vital to the success of higher education. It is critical to operations, and higher education institutions across the nation have moved with unparalleled speed and agility to serve students, faculty, and staff. Technology plays a crucial role in keeping the college community operational and making the college more resilient against cyber threats. Subsequently, the next facilities master plan update will include an assessment of the technology landscape over the next ten years.

As the master plan guides campus development of buildings and systems for the college, it also creates a roadmap for the college to follow in future years, identifies short- and long-term needs, and drives the college’s five-year capital improvements program and annual capital budget request.

Since the justification for capital projects is directly related to the college’s projected enrollment and the spaces required to accommodate its students, HCC uses the Maryland Higher Education Commission (MHEC) projections for its expected growth over the next 10 years. The following chart illustrates current and projected growth trends in enrollment by fiscal year (FY).

Unduplicated Headcount Enrollment Credit and Noncredit by Fiscal Year			
Fiscal Year	Credit	Noncredit	Total Headcount*
FY20	14,314	12,313	26,143
FY21	13,911	7,543	21,094
FY22	12,943	10,156	22,604
FY27 (Projected)	14,820	11,273	26,093
FY32 (Projected)	16,696	12,390	29,087

* The figure for “total headcount” is an overall unduplicated count of credit and noncredit rather than a sum.

*Source: HCC Databook, Annual Enrollment Trends, Planning, Research, and Organizational Development
Enrollment Projections 2023-2032, Maryland Higher Education Commission, May 2023*

The total unduplicated headcount for FY22 was 22,604, representing 12,943 for credit classes and 10,156 for noncredit continuing education and workforce development programs. The above table includes a five-year projection and a 10-year projection using the MHEC projections for headcount. MHEC's 10-year projection for credit headcount enrollment is 29 percent, while the projection for noncredit enrollment is slightly lower at 22 percent. Although these projections seem high relative to actual enrollments, it is consistent with the overall community college statewide average of 30 percent for credit enrollment and 21 percent for noncredit enrollment over the next 10 years.

MHEC's forecast for the college is based on the historical relationship between the state's population and past HCC enrollments, as well as the population projections for Howard County. MHEC collects, analyzes, and reports enrollment data from all Maryland public colleges and universities. For reporting purposes, it separates the data into two categories: 1) full-time students and 2) part-time students; and provides projections for both credit and noncredit enrollments. All projection models involve the application of a linear regression analysis to demographic and economic factors. The number of students at the community colleges was determined based on recent market share, growth rate of the institution, and the anticipated change in college-age population in each county.¹

MHEC reports that the community colleges will see a general upward trend of projected enrollments which is primarily explained by the optimistic population projections for Maryland. It is predicted that the younger population from ages 15 to 24 years will continue to grow over the next 10 years. Likewise, the number of high school graduates is also expected to grow over the next ten years. Community college is general will continue to see growth which is attributed to affordable tuition and fees, trends in high school graduates, and articulation agreements with four-year institutions. This growth, along with the changes in the per capita disposable income of Maryland residents, will impact institutions. The state's projections of economic indicators, such as changes in income, also support this projected growth.

In March 2023, the Howard County Spending Affordability Advisory Committee released its report for FY24. The committee examined current economic conditions and projections of revenues and expenditures for the county for FY24, as well as economic forecasts for FY25-FY29. The committee examined the county's economic outlook and related factors, including revenue projections, General Obligation (GO) bond authorizations, long-term fiscal outlook, and county revenue and spending patterns. While the county has weathered significant economic impact of the pandemic due to its fiscal responsibility and prudent management, the county reports there are still challenges ahead. The report highlighted the significant fiscal challenges Howard County is facing that constrain its ability to absorb new debt or fund other operating needs. The committee recommends the county's operating be limited to nor more than a 5.6% increase for FY24, recognizing that this is above historical levels because of inflation and on-time federal spending; the county's bond authorization issuance should not exceed should not exceed \$60 million; and the county should commission a long-term spending review which considers both school and general services spending limits based on projected resources.²

Other key recommended strategies include pausing new capital projects given the severe debt constraints, reducing new debt issuance over the next six years, prioritizing annual capital budget requests to address maintenance backlog in existing infrastructure, balancing service needs as a full-service county, funding for the Howard County Public School System limited to the state-mandated level, and developing a long-term strategic fiscal plan and promote commercial base growth. As capital funding remains competitive, the county will make difficult decisions to keep spending within reasonable and realistic levels. The college has been very fortunate to have received such strong support from both the county and state to assist in funding new construction and facility renewals.

State Participation

In the FY24 capital budget, the state approved funding for one project: the final phase of construction and equipping for the new Mathematics and Athletics Complex in the amount of \$13,347,000. As community college capital funding has become more competitive, the college has agreed to work with the state to split-fund design and construction dollars on eligible projects over multiple years to alleviate the burden of financing in one fiscal year.

County Participation

For FY24, the county awarded funding for three capital projects, the final phase of construction plus equipping for the new Mathematics and Athletics Complex in the amount of \$13,346,000; \$1,000,000 for the design of the Workforce Development and Trades Center; and \$1,000,000 for systemic renovations for a total of \$15,346,000. In

recognizing the limitations on the county’s bond funding, the college continues to request state funding on all eligible projects, however, it is mandated that 50 percent local share be achieved to obtain the state match.

Project Priorities

Current and new projects for this fiscal year are listed on page five. Priorities for these projects are set by the college’s board of trustees. In addition, other immediate needs and future capital projects are identified at the end of this document and are supported by the college’s facilities master plan.

Summary

The college must develop its physical space and renovate existing buildings to accommodate its students. The necessary facilities must be provided in order to educate and train these students. Enrollment projections, along with the state’s capital space allocation guidelines, are used by the state in determining the college’s space needs and evaluating construction projects and long-range capital planning. HCC’s space deficits make it eligible for new construction proposed in the capital budget. Over the past several years, the college has received significant support that has facilitated the construction of five new buildings, the renovation of four existing buildings, the construction of two new parking garages, and the expansion of one parking garage. The college’s complete facilities inventory can be found on page 14.

However, even after completing these projects, the college’s total campus space inventory continues to show a current space deficit of 95,233 net assignable square feet (NASF) and a 10-year projected deficit of 240,603 NASF. While the college continues to propose new buildings on campus to address these deficiencies, the 10-year enrollment growth multiplied by the space allocation guidelines yields large deficits. This is compounded by the state’s funding limitations and average award of one capital project per year, restricting the college’s ability to address the deficits.

As part of the capital prioritization process, the Maryland Association of Community Colleges collects current and future space deficits based on each community college’s facilities inventory. The analysis of instructional space needs for the FY25 capital budget request is reflected below and is ranked first through third, with first representing the largest deficits and greatest need for instructional space. The results show that HCC has the third largest instructional deficits among the reporting community colleges for current and projected space inventories.³

Instructional Space Needs/Deficiencies*					
Analysis of the FY23 CIP					
<u>Rank</u>	<u>Institution</u>	<u>Current Space Deficit in NASF</u>	<u>Rank</u>	<u>Institution</u>	<u>Ten-Year Space Deficit in NASF</u>
1	Hagerstown	91,391	1	Montgomery	135,050
2	Montgomery	83,274	2	Hagerstown	72,781
3	Howard	20,813	3	Howard	48,222

* Instructional space deficits include only classrooms and laboratories as self-reported.

The data emphasizes the need to address HCC’s campus-wide space deficiencies. Capital funding support is critical and a top priority for the president and board of trustees. In order to continue to support the mission, vision, and values of the college, the proper infrastructure must exist. The proposed FY25 capital budget reinforces the need for ongoing facilities construction and renewals on campus.

PRIORITY OF FISCAL YEAR 2025 CAPITAL PROJECT REQUESTS

Below are the capital project requests and priorities as approved by the board of trustees. Only projects that require funding are assigned priorities. Each of these projects is described in more detail in the sections that follow.

Year Requested	FY25 Board Priorities	HCC Project No.	HCC Project
FY25	High	M-0547	Workforce Development and Trades Center
FY25	High	M-0550	Systemic Renovations
FY30	Medium	M-0545	Maintenance Building
FY30	Medium	M-0542	Campus Roadways and Parking

High Priority – Funding for these projects is requested in the FY25 capital budget and is critical to meet college’s current capital needs.

Medium Priority – These projects are being requested in future fiscal years and although the college understands that funding will be critical to meet the goals of its long-term capital improvements program and facilities master plan, they are a lower priority.

PROJECT DESCRIPTIONS

CAMPUS ROADWAYS AND PARKING (PROJECT NUMBER M-0542)

Description

Through the analysis of the campus land plans, future building sites, forest conservation, and wetland restrictions, it was determined that construction of parking garages on campus was more realistic than additional surface parking lots. As the campus has grown to accommodate the college’s growth over the past decade, the college’s roadway infrastructure must also keep pace with the new and renovated facilities.

It remains necessary for the college to upgrade its campus roadway infrastructure and address necessary changes to vehicular and pedestrian traffic patterns over the next ten years. The college must request the construction of additional parking facilities to address the future parking shortages identified on campus as the inclusion of the parking garages on campus will offset the proposed new construction and increased usage.

Justification

Campus growth to accommodate enrollment over the last decade along with the construction of new buildings have caused the college to experience a parking deficit. Parking must be consistent with planned campus development and the college must also upgrade its campus roadways to provide safe driving conditions. The facilities master plan recommends a new campus road layout that keeps automobile traffic on the periphery of the campus leaving a car-free learning environment. This included four entry points with signage, a change in paving materials, crosswalks, and other physical language telling of the entrance to an educational institution, as well as pick-up and drop-off points. The college continues to address these recommendations as it continues to develop its campus.

The entry point to campus off Hickory Ridge Road continues to be over-utilized and extremely congested. The internal campus road does not function well for automobiles and there are pedestrian conflicts at various locations creating safety hazards at pedestrian points. As part of the campus development, the college will continue to evaluate these vehicular and pedestrian traffic patterns. The parking structures proposed for the out years include a new North Garage on Lot A, an expansion to the West Garage at Hickory Ridge (HR), and a future South Garage.

Future Outlook

While the expansion of the East Garage provided an additional 736 parking spaces and helped address parking deficits on campus, the college needs to be diligent in addressing long-term access. Therefore, the next parking garage has been identified as a necessity in the out-years and are being proposed for FY30.

Project Schedule and Cost Summary

Presented below is a summary of future funding proposed for this project.

Year	Description	County	State	Other	Total
FY30	Design–North Garage at Lot A of 750 spaces	800,000	800,000	0	1,600,000
FY31	Construction–North Garage at Lot A of 750 spaces	9,250,000	9,250,000	0	18,500,000
FY35	Design–West Garage expansion	700,000	700,000	0	1,400,000
FY36	Construction–West Garage expansion	8,500,000	8,500,000	0	17,000,000
FY38	Design–future South Garage	550,000	550,000	0	1,100,000
FY39	Construction–future South Garage	6,000,000	6,000,000	0	12,000,000
Total		\$25,800,000	\$25,800,000	\$0	\$51,600,000

MAINTENANCE BUILDING (PROJECT NUMBER M-0545)

Description

As the college continues to expand, the campus maintenance area needs to accommodate the campus growth. The college's utilities also need to be consistently evaluated and upgraded to support future buildings and load requirements. To properly serve the needs of the campus, the college proposes a maintenance building that will house facilities, maintenance, grounds, and environmental services.

In order to maintain the infrastructure throughout the campus, a proper maintenance facility is required. The facilities department must also assure the cleanliness of all college facilities and grounds to help maintain an environment conducive to learning.

The proposed building will be created and designed in a way that delineates service space, office space, and means of access. The overall project will include utility infrastructure to provide appropriate systems, including mechanical, electrical, plumbing, thermal insulation, and electronic/data, consistent with typical office construction and campus standards. This new facility is necessary to provide around-the-clock building maintenance including operational and environmental monitoring of new and existing facilities that serve the campus.

Justification

With recent construction and renovations on campus, the college maintains a total of 909,450 on-campus gross square feet (GSF). In order to properly service the campus infrastructure, its buildings, and the college community, a maintenance building must be constructed. Advances in technology and fast-paced innovation are also considerations for this new facility. New technologies, as well as sustainability initiatives such as green technology, solar power, and geothermal energy, will assist the college in developing cost-savings programs that will enhance building efficiency and ultimately decrease operating costs. The new building will help the facilities department in its efforts to maintain the functional integrity of the physical plant and provide a safe and comfortable environment for the college campus. On a campus with future growth planned, a dedicated maintenance building is essential.

Project Overview

- Building Footprint: 18,000 GSF / 12,000 NASF
- Areas Served: facilities, maintenance, grounds, environmental services
- Occupancy: service areas and equipment bays
administrative areas
storage and environmental areas
- Project Status: proposed for design in FY30

Future Outlook

With the expansion of the college's campus and the demands on its facilities, it is important to identify this building as a necessary capital project. As indicated in the college's facilities master plan, it was determined that the maintenance building would be associated with the new parking garage proposed on Lot A. The college will plan this project accordingly to determine its feasibility. Design funds are requested in FY30 consistent with the next parking garage.

Project Schedule and Cost Summary

Presented below is a summary of funding for this project.

Year	Description	County	State	Other	Total
FY30	Planning and Design	250,000	250,000	0	500,000
FY31	Construction	1,950,000	1,950,000	0	3,900,000
FY32	Furniture and Equipment	750,000	750,000	0	1,500,000
	Total	\$2,950,000	\$2,950,000	\$0	\$5,900,000

WORKFORCE DEVELOPMENT AND TRADES CENTER (PROJECT NUMBER M-0547)

Description

The workforce, career and community education division supports the college's mission by providing noncredit courses, contract training courses, professional skills and job training, as well as services to individuals, county agencies, and employers.

Recognizing that workforce development and skills training is another route for college, HCC developed its first pathway into high-skilled trade occupations for high school students and residents. Since starting the HVAC-R register apprenticeship program in 2019 with 12 apprentices, the number of apprentices in training has grown to 101 in just four years—an increase of 742%. This data confirms that Howard County residents are looking for skilled training opportunities. While there are for-profit educational providers, these types of for-profit schools may not be in the best interest of the students. For-profit schools have historically reported higher school closures and student loan defaults. This project will allow the continuing education and workforce development division to deliver quality skilled trades programs and services to its students and the county.

Justification

The college's vision includes building up more high-skilled trade training opportunities for students through the development of a trades center. Offering this additional pathway into higher education through skilled trades will provide a viable option for those high school students and residents who do not want to pursue a traditional four-year degree. The added opportunity to expand these programs into high schools through Career Technical Education (CTE) dual enrollment can capture students who are in danger of dropping out.

Partnerships with public schools and dual enrollment opportunities for students are critical in helping students earn credit toward graduation. Career and technical education pairs academic knowledge with technical skills to prepare students for in-demand and high-skilled jobs. CTE programs provide opportunities for students to receive industry certificates while earning college credit and gaining work experience. Trades programs will allow students to explore a wide range of workforce options and apply academic and technical skills to a specific career path.

Currently, Maryland is experiencing labor shortages in all skilled trade occupations. Proposed programs to be housed in the Workforce Development and Trades Center will address skilled shortages in the following areas: automotive technology; welding; additive manufacturing, mechatronics, and logistics; electrical; HVAC; plumbing; forklift/heavy equipment operations; green technology; and cyber security. These occupations meet the standard for high-quality jobs, offering a family-sustaining starting salary, wage progression, and benefits.

The equity and opportunity gaps for minoritized populations can be addressed through skilled trade training programs that yield high-wages. Establishing a Workforce Development and Trades Center will help ensure that students who graduate from skilled trades programs have strong employment prospects with family-sustaining salaries upon completion.

The proposed Workforce Development and Trades Center is necessary to ensure that the college continues to delivering high quality programs and services. Providing opportunities for licensure, certification and employment are critical in meeting the needs of the community. The college must provide the appropriate spaces to accommodate the demands of its students and the program offerings needed to be housed in this facility.

Existing Conditions

The continuing education and workforce development division provides special services to county and state agencies through skilled trades programs as well as other disciplines such as contract training in business management, healthcare, advanced technology, and other areas. Services include open enrollment classes for personal and professional development, year-round enrichment programs for elementary, middle, and high school students, non-traditional high school diplomas for adults, credit opportunities in a noncredit format, adult basic skills and literacy courses, and a variety of levels of English as a Second Language training.

Approximately forty full-time and part-time employees are currently located in the existing Hickory Ridge Building, with five additional employees staffing the Training & Development Solutions (TDS) by Howard Community

College located in the Maryland Innovation Center. Courses and programs are offered in a variety of formats and are held at various sites throughout Howard County. The majority of classes are held either on the first floor of the Hickory Ridge Building of approximately 18,300 square feet or at the TDS which is approximately 14,200 square feet located in the Maryland Innovation Center at Columbia Gateway Drive in Columbia. The English as a Second Language program and the English Language Center expanded into six offices, six additional classrooms, and a conference/storage room on the second and third floors of the Hickory Ridge Building comprising an additional 7,100 square feet in the Hickory Ridge Building. In addition, the Kids on Campus program uses all available space at the Hickory Ridge Building during its annual summer program.

Classes are also offered at the Laurel College Center, where the continuing education and workforce development division shares 48,871 square feet of instructional space with HCC’s credit division and Prince George’s Community College credit and noncredit divisions. Space is also utilized on the main campus in Howard Hall for the healthcare skills labs, plus four to five classrooms in the Howard County public high schools for evening classes.

Because of space limitations in the Hickory Ridge Building and at the TDS, the skilled trades programs must be housed in its own facility. Then with the completion of the Mathematics and Athletics Complex, the mathematics division will move out of the Hickory Ridge Building allowing the continuing education and workforce development division to expand within the existing building into those vacated areas.

The college’s strategic initiatives commit the institution to taking a lead role in workforce training and supporting the Howard County and Maryland economic development efforts. Given the economic conditions, advances in technology, innovation, and shifting demographics of the regional workforce demand skilled individuals. The college’s mission charges the institution with responding to the economic needs of its community.

Project Overview

- Building Footprint: 49,998 GSF / 29,999 NASF
- Areas Served: workforce development and skilled trades
- Occupancy: credit and noncredit programs—automotive technology; welding; additive manufacturing, mechatronics and logistics; electrical; HVAC; plumbing; forklift/heavy equipment operations; green technology; and cyber security classrooms, labs, assembly areas, group project areas and bays staff and faculty offices, conference and meeting rooms storage, custodial, telecommunications areas
- Project Status: under design in FY24

Future Outlook

The demand for workforce training and skilled trades will continue to grow over the next decade. It is envisioned that cybersecurity will touch all disciplines as technology rapidly changes and advances. Due to labor shortages and skilled trade demands, this project is identified as a critical capital need.

Project Schedule and Cost Summary

Presented below is a summary of funding for this project. Funds listed under County for FY24 are PayGo funds. The source of the Other funds is through college grants, donations, legislative bond initiatives, fund balances, and the operating budget.

Year	Description	County	State	Other	Total
FY24	Planning and Design	\$ 1,000,000	\$ 0	\$ 4,300,000	\$ 5,300,000
FY25	Construction (split-funded)	5,000,000	8,609,000	3,609,000	17,218,000
FY26	Construction (split-funded)	5,000,000	11,916,000	1,616,000	18,532,000
FY26	Furniture and Equipment	0	2,100,000	2,100,000	4,200,000
	<i>Subtotal for FY26</i>	<i>5,000,000</i>	<i>14,016,000</i>	<i>3,716,000</i>	<i>22,732,000</i>
	Total	\$ 11,000,000	\$ 22,625,000	\$ 11,625,000	\$ 45,250,000

SYSTEMIC RENOVATIONS (PROJECT NUMBER M-0550)

Description

This project addresses campus-wide systemic renovations and deferred maintenance. The project includes improvements to the college’s physical plant, facility renewals, safety and code compliance at the college campuses.

Justification

Below are the necessary projects inclusive of all college campuses and locations that include compliance with current safety standards and necessary facility renewals:

FY25	Facilities Master Plan & Facilities Condition Assessment	350,000
	Phased deferred maintenance	400,000
	Interior improvements (classrooms, offices, and other)	150,000
	Café on the Quad modifications	<u>100,000</u>
	Total	\$1,000,000
FY26	Café on the Quad modifications	100,000
	Phased deferred maintenance	550,000
	Interior improvements (classrooms, offices, and other)	<u>350,000</u>
	Total	\$1,000,000
FY27	Café on the Quad modifications	150,000
	Phased deferred maintenance	650,000
	Interior improvements (classrooms, offices, and other)	<u>200,000</u>
	Total	\$1,000,000
FY28	Café on the Quad modifications	100,000
	IT/AV upgrades and modifications	700,000
	Phased deferred maintenance	350,000
	Interior improvements (classrooms, offices, and other)	<u>850,000</u>
	Total	\$2,000,000
FY29	Café on the Quad modifications	300,000
	IT/AV upgrades and modifications	200,000
	Phased deferred maintenance	650,000
	Interior improvements (classrooms, offices, and other)	<u>850,000</u>
	Total	\$2,000,000
FY30	Café on the Quad modifications	300,000
	Phased deferred maintenance	750,000
	Interior improvements (classrooms, offices, and other)	<u>950,000</u>
	Total	\$2,000,000

Future Outlook

The building condition assessment and critical campus systems are evaluated annually. The facilities condition assessment helps the college prioritize its deferred maintenance schedule. It provides an audit of systems including mechanical, electrical, structural, and life safety helping reduce operating costs and increase building efficiencies.

Project Schedule and Cost Summary – presented below is a summary of funding for this project.

Year	Description	County	State	Other	Total
Prior	Design/Construction/Equipment	12,456,000	0	0	12,456,000
FY25	Design/Construction/Equipment	1,000,000	0	0	1,000,000
FY26	Design/Construction/Equipment	1,000,000	0	0	1,000,000
FY27	Design/Construction/Equipment	1,000,000	0	0	1,000,000
FY28	Design/Construction/Equipment	2,000,000	0	0	2,000,000
FY29	Design/Construction/Equipment	2,000,000	0	0	2,000,000
FY30	Design/Construction/Equipment	2,000,000	0	0	2,000,000
	Total	\$21,456,000	\$0	\$0	\$21,456,000

OTHER IMMEDIATE NEEDS AND FUTURE PROJECTS

- Training & Development Solutions by Howard Community College at the Maryland Innovation Center - Currently, the TDS occupies 14,247 gross square feet in the Maryland Innovation Center. With increased needs from growing businesses in Howard County and the surrounding counties, additional space is justified to effectively serve the county and meet the demand. The space that HCC occupies in the center is owned by the county and the college is currently working with the Howard County Economic Development Authority with the redevelopment of the Maryland Innovation Center.

PROJECT COMPLETION - NO FUNDING REQUEST

While there is no future funding request and the following project is not included in the FY25 capital budget, it is listed as part of the capital budget appendices until project closeout.

MATHEMATICS AND ATHLETICS COMPLEX (PROJECT NUMBER M-0539)

Description

The purpose of this project is to construct a new facility that will unite both academics and athletics to provide the necessary space to accommodate mathematics, athletics, recreation, student services functions, and a multi-purpose event area. The new facility is proposed at 163,375 gross square feet (GSF) and 95,155 net assignable square feet (NASF). Shared spaces that will connect mathematics and athletics will include instructional space, study and tutoring areas, and a multi-purpose area.

Justification

Combining academics with athletics is an innovative approach to promoting sound mind and body while meeting the intellectual and physical needs of the college community. The new complex links student pursuits for the mind (mathematics), for the body (athletics), and for the spirit (recreational wellness) and serves as a central hub to provide critical space for student learning and engagement. The complex connects math and athletics and provides access to respective academic spaces, study and gathering areas.

Project Overview

- Building Footprint: 163,375 GSF / 95,155 NASF
- Areas Served: mathematics, athletics, recreation, student services functions
- Occupancy: classrooms and labs, study areas and project rooms
gymnasium and multipurpose space
division office, administrative and faculty offices
storage, custodial, telecommunications
- Project Status: design commenced early spring 2020 (FY20) and completed summer 2021 (FY22)
construction began spring 2021 (FY21) and continues through fall 2024 (FY25)
access to the new gym and demolition of existing gym began winter 2023 (FY23)
final construction phase following demolition spring 2023 to summer 2024 (FY24)
project completion anticipated in fall 2024 with grand opening spring 2025 (FY25)

Project Schedule and Cost Summary

Presented below is a summary of funding for this project.
